**ELECTRICAL MEASUREMENT  
AND ANALOGUE ELECTRONICS**

June/July 2016

Time: 3 hours

**THE KENYA NATIONAL EXAMINATIONS COUNCIL**

**DIPLOMA IN ELECTRICAL AND ELECTRONIC ENGINEERING  
(INSTRUMENTATION OPTION)  
(TELECOMMUNICATION OPTION)  
(POWER OPTION)**

**MODULE I**

**ELECTRICAL MEASUREMENT AND ANALOGUE ELECTRONICS**

**3 hours**

**INSTRUCTIONS TO CANDIDATES**

*You should have the following for this examination:*

*Drawing instruments;*

*Non-programmable electronic calculator;*

*Mathematical tables.*

*This paper consists EIGHT questions into TWO sections; A and B.*

*Answer any THREE questions from section A and any TWO questions from section B in the answer booklet provided.*

*All questions carry equal marks.*

*Maximum marks for each part of a question are as shown.*

*Candidates should answer the questions in English.*

900

f.s

oscillates

1100.50  
25  
550

**This paper consists of 5 printed pages.**

**Candidates should check the question paper to ascertain that all the pages are printed as indicated and that no questions are missing.**

**SECTION A: ELECTRICAL MEASUREMENTS**

Answer any **THREE** questions in this section.

1. (a) Define the following system of units as applied in measurements:  
 (i) absolute unit;  
 (ii) derived unit. (2 marks)

(b) Derive the dimensions of the following quantities using the electrostatic system of units:  
 (i) charge (Q);  
 (ii) current (I). (8 marks)

$Q = I \times \text{time}$   
 $I = \frac{V}{R}$

(c) State **four** advantages of the MKS system of units in electrical measurements. (4 marks)

(d) Using the LMTI system of units, derive the dimensional equations for:  
 (i) EMF;  
 (ii) magnetic flux density. (6 marks)

$\text{EMF} = \frac{\text{work}}{\text{charge}}$   
 $\text{magnetic flux density} = \frac{\text{flux density}}{\text{area}} = \frac{\text{EMF} \times \text{time}}{\text{area}}$

2. (a) Explain the following types of measurement errors:  
 (i) environmental errors; - due to external conditions external to the instrument  
 (ii) instrumental errors; - occur due to the fault of the instrument  
 (iii) gross errors; - error due to human mistake  
 (iv) residue errors. - errors due to the lack of cleaning  
 Random - accidental - small one (8 marks)

(b) State **three** detectors and their operational frequencies as commonly used for a.c. bridges. (6 marks)

(c) Explain how the following factors affect precision measurement of medium resistance with wheatstone bridge:  
 (i) temperature effects;  
 (ii) contact resistance;  
 (iii) thermo-electric effects. (6 marks)

3. (a) State **three** causes of faults on a printed circuit board. (3 marks)

(b) List **five** tools used in the repair and maintenance of electronic equipment. (5 marks)

(c) Explain **three** points a service engineer should consider when fault finding on electronic equipment. (6 marks)

(d) Outline **three** operational objectives and **three** cost objectives of good maintenance. (6 marks)

(a) Describe the term 'reliability' as applied in electrical measurements. (4 marks)

It is the ability of a machine to perform operational tasks without failure over a given time under specified conditions.

(b) Explain the importance of the following in relation to reliability:

- (i) mean time between failures; - Time when the machine will stop the work.
- (ii) mean time to failure; - To solve the purpose when in need of failure.
- (iii) availability. - the availability of a machine to solve the specified purpose. (6 marks)

(c) Table 1 shows the performance of ten pressure monitors, observed while operating for a period of 1200 hours. Every failed unit is replaced immediately. Determine the:

- (i) MTBF;
- (ii) failure rate (10 marks)

Table 1

Unit Number	Time of Failure (hours)	Failure
1	650	1
2	420	1
3	130 and 725	2
4	585	1
5	630 and 950	2
6	390	1
7	No failure	0
8	880	1
9	No failure	0
10	220 and 675	2

- (a) State three reasons for the inaccuracies encountered in magnetic measurements. (3 marks)
- (b) Outline six methods of fault location in electronic systems. (6 marks)
- (c) Explain the following wattmeter errors:
  - (i) eddy current errors;
  - (ii) stray magnetic field errors. (6 marks)
- (d) Draw a labelled construction diagram of Hibberts magnetic standard used in magnetic measurements. (5 marks)

**SECTION B: ANALOGUE ELECTRONICS**

Answer any **TWO** questions from this section.

1.2  
12.5 MF

6. (a) Explain how the following extrinsic semi-conductors are formed.

- (i) N-type; - formed by adding pentavalent atoms
- (ii) P-type. - formed by adding trivalent atoms. (4 marks)

(b) (i) State **three** applications of semi-conductor diodes - as a switch, photo diode, LED, light emitting Diode  
 (ii) With aid of voltage-current characteristics, describe the avalanche breakdown in a P-N junction diode. (10 marks)

(c) A silicon diode has a forward voltage drop of 1.5V and a forward d.c. current of 150 mA. It has a reverse current of 1.2 μA and a reverse voltage of 12 V. Determine for the diode the:

- (i) forward resistance;  $R_f = \frac{V_f}{I_f} = \frac{1.5}{150 \text{ mA}}$
- (ii) reverse resistance.  $R_r = \frac{V_r}{I_r} = \frac{12 \text{ V}}{1.2 \mu\text{A}}$  (6 marks)

7. (a) Draw equivalent two source biasing circuits using the transistor symbol for the following:

- (i) PNP transistor;
- (ii) NPN transistor.

(b) Figure 1 shows an amplifier circuit.

- (i) Determine the d.c. operating point.
- (ii) Sketch the d.c. loadline.

NB: neglect  $V_{BE}$

$V_{CC} \quad I_{C(sat)} \approx \frac{V_{CC}}{R_B + R_C}$

Fig. 1

- (c) State **two** advantages and **two** disadvantages of field effect transistors over bipolar junction transistors. (4 marks)
8. (a) State **three** advantages of bridge rectifier over bi-phase rectifier. (3 marks)
- (b) (i) With aid of circuit diagram and voltage waveforms, describe the operation of a single phase half wave rectifier feeding a purely resistive load. (11 marks)
- (ii) Derive the expression for the output d.c. current for the rectifier in b(i).
- (c) Figure 2 shows a zener diode stabilizer. Determine the output voltage with no load current. (6 marks)

Fig. 2
